ABOUT ME

Master of Business Analytics student at UNITEC with a Data Science background and hands-on experience in Python, SQL, machine learning, data cleaning, exploratory data analysis, and business intelligence. Experienced building end-to-end predictive analytics projects using real-world datasets, including regression, classification, feature engineering, model evaluation, and interactive dashboards. Passionate about solving complex business problems with data and maintaining an active GitHub portfolio.

EDUCATION

2025 - present

UNITEC, Auckland

Master of Business Analytics

Relevant coursework: Data Analytics, Machine Learning, Business Research Methods, Data Storytelling, Web Analytics, Design Thinking, Analytics Storytelling, Design thinking, Strategic IQ, Change management

2025

Data Science program by Dr. Farzad Minoei

TECHNICAL SKILLS

·Programming: Python, SQL
·Machine Learning: Linear Regression, Logistic Regression, Decision Trees, Random Forest, XGBoost, Classification, Regression
·Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Analysis, Model Evaluation
·Visualisation: Tableau, Power BI
·Tools: Git, GitHub, Jupyter Notebook, Visual Studio Code, MySQL, Orange Data Mining

GITHUB PROFILE

- https://github.com/mostofiamirmehdi-debug_

PROJECTS

Used Car Price Prediction (Python, Regression)

Developed a machine learning pipeline to predict used vehicle prices using Python. Cleaned and transformed automotive data, engineered predictive features, evaluated regression assumptions, and assessed model performance.

Customer Churn Prediction (Classification)

Built classification models to predict customer churn. Performed preprocessing, feature selection, model evaluation, and interpretation to identify factors influencing customer retention.

Financial Crime Detection

Developed machine learning models for suspicious transaction detection. Applied data cleaning, feature engineering, and evaluated classification performance using ROC-AUC.

Tableau Dashboard Project

Designed interactive dashboards to communicate business insights and support decision-making. Interactive dashboard for Airbnb dataset

Active GitHub portfolio showcasing machine learning, regression, classification, Python, Tableau, and business analytics projects.

EXPERIENCE

Rabin Marine Shipping Co.

2019 - 2025

sales Analyst - Customer relationship

Analyzing sales data every month, preparing report for the manager every three month, and creating dashboards for getting insights from the sales data.
